Elderbridge Alliance Services

Home Again provides support to individuals who return home from a hospital or nursing facility. Through an evaluation of needs, barriers are identified that need to be addressed in order to experience a successful transition back home.

Care Coordination utilizes an interactive assessment process to provide information and support to individuals to assist them in decision making for long-term living needs. A plan of action is developed followed by coordination, referral, and monitoring as needed.

HomeMeds is an in-home medication assessment program that uses HomeMeds software to screen medications of individuals for potentially harmful problems. Findings are reviewed by a consulting pharmacist who brings significant problems to the attention of their physicians.

Home Safety Assessment helps identify potential fall and safety hazards that may be present. Recommendations will be made to address barriers and improve safety in the home.

Healthcare Visit Companion accompanies individuals to medical appointments, assists with communication to the medical provider, advocates for care, and ensures understanding of prescribed treatment.
